

Fitting your Comunica helmet (*BETA+*, *DELTA+* or *OMEGA+*)

DPPADFITA 021004

1. Hold a cloth tapemeasure over the eyebrows

2. Get a friend to measure round your head the longest way, to 1cm

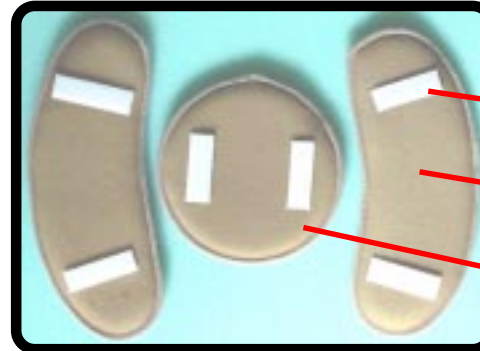

3. Note this measurement. It is your Euro head size you should ask us for. If you think you have an exceptionally "long" or "wide" head, please tell us. Your perfect helmet fit may be a size larger with side or front fitting pads!

Round the longest way!

4. Alternatively, you can ask for eg a 62cms "XL" helmet and a fitting pad set. This lets you fit your passenger or pupil whatever head size is needed.

The 3-pad set we usually supply is called: **PAD+**

You can order the pad parts separately too:

Velcro fixer strip: **PADVEL1**

Front/back pad: **PAD/BAN/LONG/8**

Top pad: **PAD/CIRC/8**

For 62/64cms no pads are needed and the pad fits below are suggested for fitting smaller heads:-

For 60cms head, fit 1 pad

For 58cms head, fit 2 pads

For 56cms head, fit 3 pads

For 54cms head, fit 4 pads
